

Worm gear reducers

PN: SSR-UC002

Technical parameter

- A steel shafts bearing guides with standard mounting metal body average overall
- dimensions minimum : L = 180mm l =180 mm h = 225mm
- For radial contact ball bearings, provide four obstacles on the inner rings and two stops on the outer rings.
- These obstacles and stops must be diversified (locknuts, elastic rings, washers, assembly screws, etc.).
- Gluing or welding are not acceptable; provide sealing rings; spacer rings must be made of metal.
- cover + clinches screwed cover + braking.
