

Two-stage combination gearboxes (cylindrical and conical)

PN: SSR-UC003

Technical parameter

- Two-step mixed gear units (cylindrical and conical)
- Shafts, steel, bearing-guided with standard metal body mounting
- dimensions minimum : L =330 mm , l = 250 mm h = 180 mm
- For radial contact ball bearings, provide four obstacles on the inner rings and two stops on the outer rings. These obstacles and stops must be diversified (locknuts, spring rings, washers, assembly screws, etc.).
- Provide seals; spacer rings must be metal.
