

## Two-stage combination gearboxes (cylindrical and conical)

PN: SSR-UC004

### Technical parameter

- Bearing-guided steel shafts with standard mountings: metal body
- Dimensions minimum : L =270 mm , l = 180 mm h = 180 mm
- For radial contact ball bearings, provide four obstacles on the inner rings and two stops on the outer rings.
- These obstacles and stops must be diversified (locknuts, elastic rings, washers, assembly screws, etc.).
- Provide seals; spacer rings should be metal.
- cover + clinching, screw cover + braking ...)
